

XM radio is an innovative, cutting edge technology that is a choice, a financial choice, for its listeners. I opt to buy their services, hardware and programming each month. For the government to intercede into ones First Amendments rights of free speech I think is a treacherous domain where the government should stay out. The FCC controls "free" airwaves and limits what one can view, listen to and hear expressed. XM is a paid forum and it should remain exactly that.

Please ensure that our civil liberties are not infringed and NAB's petition 04-160 is rejected at the soonest possible time.

Thank you,
